American Technology Components is offering a single/dual room slide-out controller.

This electronic backlighted slide-out control is designed to control up to 2 separate rooms with one pump.

Features include:

The switch panel has a tamper proof button sequence to prevent children from tampering with the system.

Recessed mounting screw locations with trim ring.

The push button switch panels are directly connected with the module using a plug-in RJR-11 modular cable.

A built in safety feature prevents the slide from operating in the event the ignition is on.
