+11V DC TO +14V DC  
16 AMPS DC  
-40C TO +85C  
6.73" LENGTH X 2.53" WIDTH  
5.55" LENGTH X 1.35" WIDTH

If you're looking for a compact switch panel loaded with quality features, you've found it! The SX3000 series rocker switch panels are engineered to last, with molded A.B.S. mounting panels, L.E.D. or optional Electroluminescent backlighting and 10amp mini-rockers.

Electroluminescent eliminates the need for lamp replacement. It also offers complete flexibility to selectively light up any surface on the panel, while eliminating 'hot spot' backlighting associated with LEDs or incandescent lamps.

Available options include:

- Two-to-six switch assemblies
- Lighted or non-lighted switches
- Electroluminescence backlighting
- Led backlighting

American Technology manufactures panels that meet or exceed automotive standards. With backlighting rated at 100,000 hours and switches rated at 50,000 cycles, electrical switch warranties will become a thing of the past.
